NEWS RELEASE

MICHIGAN TECH TO HOST 2012 TRANSPORTATION CONFERENCE

Michigan Tech has been selected to host the annual summer meetings of the Council of University Transportation Centers (CUTC) and the University Transportation Center Program (UTC). The two and half day conference will bring approximately 150 transportation researchers from more than 60 universities and federal representatives from the Federal Highway Administration (FHWA) and the Research and Innovative Technology Administration (USDOT-RITA) to the Keweenaw in June of 2012. Michigan Tech's UTC-MiSTI, the Michigan Tech Transportation Institute (MTTI), and Michigan's Local Technical Assistance Program (LTAP) are hosting the meetings and managing event logistics.

"We're thrilled to have been selected as the host site for the 2012 CUTC/UTC meetings. We've been working hard to increase Michigan Tech's visibility among our peer institutions and with our federal partners and this is evidence that we're making progress," commented Larry Sutter, Director of the UTC-MiSTI and MTTI.
